**Subject:** No Northern Pass please

My husband is speaking at the public hearing tonight and I am unable to do so but wanted to reiterate what he is testifying to. We run Tamarack Tennis Camp on Route 116. My grandparents started the camp and we are the third generation to enjoy the amazing gift of the location and unique camp livelihood. Route 116 is peaceful and gorgeous. We serve anywhere from 80-100 kids a summer and pride ourselves on providing a small family like environment. Tamarack changes kids lives and creates an environment for people to learn to be their best self. It is hard to imagine the decimation the proposed project would impose on the valley and all its residents, but there is no doubt it will be devastating to our business. Two years of construction up and down Easton Road, as well as the construction on 112 and in and through Franconia would jeopardize our ability to operate and would put the future of our camp in question. I strongly urge you to think about the consequences this proposed project will have on the local residents, business owners, tourists, future generations, as well as the lasting existing and potential environmental impacts this pins on NH. I think we can and should do better in finding energy solutions that don't have.

Thank you.

Wren Miller
